Being Touched and Being in Touch – Sich berühren lassen Methodical–Didactical Approaches

April 29– May 2, 2020, at the Anthroposophical Center, Kassel

Dear Colleagues,

At this year's annual conference of the International Training Circle, the question will once again be at the center of our work: How can contemporary educational processes be designed for adults who want to become active in our field of work?

This year, we will focus in particular on the phenomenon of 'being touched'. What touches me? How do I get in touch with what is important? What are the conditions that allow me to be touched? How do we design processes in which touch can be experienced?

This year's program places a particularly emphasis on elements of practice, as well as space for reflection, dialogue and exchange. In this way we want to experience, test and make available to each other our methodical–didactic approaches and experiments.

Everyone who is active as mentors, lecturers and instructors in professional education and training contexts in anthroposophic curative education and social therapy is warmly invited!

In addition, we will continue to discuss our joint intention to organize regional peer-to-peer training conferences, learning partnerships and other activities in addition to the Kassel Annual Conference.

This year, again, we would like to finance this work in solidarity. We are once more asking those training centers which have the possibility to contribute to our fund for travel expenses with donations. In addition to the standard amount, we also offer a sponsorship amount in the registration form. We also ask those who are dependent on financial support to check carefully what other means they can use, so that we can distribute the available funds to support as many colleagues as possible.

We look forward to working together!

Warmly,

Ralf Giese & Jan Göschel
